

## **EPICS**

People who want to feel social person in their life can use the application with their photos. They could register into application as you user after that they can use it on their Android mobil devices. There are two options to register the system. One of them is enrolling on the application web site and the second way is enrolling by using the application. Everybody could install application thanks to web site which has a link that transfers to the Google Play Store. You can enroll the application with your username and password. After register operation, everybody has own profile which has different features. Users can upload and share their photos with their current location and they can find people who share photos onto to around their current location. Of course, all this profile operations occur onto real world map. Thanks to this user could feel themselves traveller and sociable.
